

Weed Monitoring Schedule:

- will be adjusted according to weed and grass growth rates
- will count the initially removed shoots from each main area, allowing an assessment of the rootstock strength
- will be seasonally adjusted to allow for strong growing times in late winter and early spring.

This is a calendar for surveying weed growth and recommended actions to take.

	Winter			Spring			Summer			Autumn		
	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May
Week #	1	1	1	1	1	1	1	1	1	1	1	1
	2	2	2	2	2	2	2	2	2	2	2	2
	3	3	3	3	3	3	3	3	3	3	3	3
	4	4	4	4	4	4	4	4	4	4	4	4
		5	5		5		5	5		5		5

Weeks highlighted in Yellow:

On these weeks a survey of the affected areas should be conducted as well as mowing to maintain ground visibility.

Weeks highlighted in Green:

These weeks are to survey and chip out any shoots that are emerging and only mow if necessary.

Review Process for Schedule

- To monitor the changes in weed growing speed and numbers
- Compare to the last survey and the survey of the same time the previous year, at the time of the survey. This will show the progression of the weed removal.
- If there are no weeds showing for more than a month, then the weed monitoring might begin to be adjusted, then phased out
